4x

Faster JD Turnaround

70%

Less Manual Screening

3x

Interview Coordination Efficiency

About the Client: Building India’s Fastest-Growing Insurance Brand

HDFC Ergo General Insurance, as a homegrown powerhouse in the Indian general insurance space, was rapidly becoming the second-largest brand in its category nationwide. Their success hinges on their ability to scale their workforce, particularly their Feet-on-Street (FOS) associates, who play a vital role in dealer relationships and customer engagement.

HDFC Ergo's challenge was to hire hundreds of FOS associates every month to maintain their growth trajectory, making it critical to optimize and accelerate their recruitment processes.

The Challenge: Scaling Talent Without Losing Control

To meet the high-volume hiring demands, the HR team faced several challenges:

- Manual JD Creation** : Slowed down time-to-hire, with inconsistencies and delays across different regions.
- Exhaustive Resume Screening**: Manually sifting through resumes from multiple sources drained productivity.
- Interview Coordination Overload**: Scheduling over 1,200 interviews monthly led to endless follow-ups and chaos.
- Error-Prone Trackers**: Manual performance monitoring led to unreliable data.
- Lack of Hiring Transparency** : No unified view of hiring metrics, which hampered agility and decision-making.

These inefficiencies threatened timelines, candidate experience, and the overall hiring quality.

The Solution: Painting a Bright Future with NovaSuite and Agentic AI Hiring

NovaSuite by iona.ai was introduced to HDFC Ergo General Insurance as the AI-powered, agentic hiring platform that could eliminate bottlenecks and enhance recruitment outcomes. NovaSuite’s capabilities include:

- AI-Powered Job Descriptions** : Automatically generate role-specific job descriptions tailored by region and function, speeding up the process
- Intelligent Resume Matching** : Instantly surfaces top talent by screening resumes across multiple channels.
- Joining Risk Predictions** : Identifies potential candidate dropouts or offer rejections early, allowing HR teams to take proactive actions.
- Centralized Candidate Profiles** : Offers full visibility into candidate history, past interviews, and selection outcomes.
- Automated Interview Scheduling** : Sends smart reminders and notifications to candidates and interviewers, eliminating the need for manual follow-ups
- Real-Time Dashboards** : Provides a unified view of hiring metrics such as offer rollouts, acceptances, and recruiter performance.
- Actionable Analytics** : Deep insights into interview efficiency, selection ratios, funnel drops, and offer declines.
- Accurate Candidate Data** : Automated documentation ensures zero errors, increasing compliance and confidence.
- Time & Resource Efficiency** : Automating manual tasks allows HR to focus on strategic hiring and relationship building.
- Aligned to Growth Vision** : The entire transformation is geared towards supporting the company's ambition to become a market leader

Implementation: Built for Scale, Designed for Agility

NovaSuite was deployed swiftly and seamlessly, integrating with existing systems without duplication of efforts. The platform’s user-friendly, natural-language interface allowed recruiters to adopt the system with minimal training. The transition was smooth, and within weeks, the HR team had full control over a sophisticated, AI-powered hiring engine.

Results: A Recruitment Revolution at Scale

The results were immediate and impactful for HDFC Ergo:

- 4X Faster JD Turnaround Time** : Drastically reducing time-to-hire by automating JD creation.
- 70% Reduction in Manual Screening Hours** : AI-enabled resume matching eliminated manual screening, boosting productivity.
- 3X Improvement in Interview Coordination Efficiency** : Automated scheduling and reminders streamlined the interview process.
- Real-Time Visibility Across Hiring Metrics**: Real-time dashboards provided full transparency into the hiring pipeline.
- Lower Dropout & Rejection Rates**: Early risk predictions allowed proactive intervention, reducing dropouts.
- Higher Candidate Satisfaction**: Streamlined processes and timely communication improved the candidate experience.

"Our manual hiring process couldn't keep up with the volume. iona.ai's platform allowed us to track key metrics efficiently. The simplicity and customization options made it a game-changer for us."
– AGM-HR, HDFC Ergo General Insurance
